EDUCATION

Lovely Professional University (LPU)
Bachelors of Computer Application (Game Specialization)

Punjab, India
Aug 2023 – Present

PROFESSIONAL EXPERIENCE

Environment and Level Designer

Sep 2025 – Present

WhiteShadow

Remote

- Designed a level with optimized mesh assets with respect to the lighting of the level and developed custom decal material in Unreal Engine 5 material editor to make the environment more realistic and horror.
- Developed and integrated a custom Engine.ini file for custom movie rendering pipeline to achieve a cinematic and realistic render output with Path tracing method.

PROJECTS

Little Adventurer | Unity 6

- Developed a single-player, isometric action-adventure game, building a complete gameplay loop from character control to level completion.
- Implemented a skill-based combo system for melee combat, utilizing the **Animator Controller**, **animation events**, and **state machine** logic to create a fluid and responsive feel.
- Integrated a variety of **environmental traps and hazards** (e.g., rapidly opening/closing gates) to create engaging level design challenges.
- Prepared the project for showcase by creating a polished build with Game Design Document (GDD), a professional [itch.io](#) and [GameJolt](#) page, and a gameplay trailer and published source codes on [GitHub](#).

Countdown | Unreal Engine 5

- Designed and created a 3D FPS (First Person Shooter) game ([Countdown](#)) in Unreal Engine 5 focusing on immersive gameplay and **cinematic storytelling** where player needs to diffuse the bomb before time runs out.
- Built **enemy AI with tracking, pathfinding**, and damage systems using Blueprints to create engaging combat encounters.
- Developed **weapon systems** (shooting, pickups) and player/enemy health & scoring mechanics through a centralized **Game Manager**.
- Optimized game performance** by managing textures, materials, and **Nanite** settings for cross-device compatibility.

Knight Run | Godot 4

- Planned and developed a **2D platformer** game ([Knight Run](#)) in Godot 4.
- Implemented ray casting and damage function on enemy ai using GDScript and colliders.

Animation | Blender & Unreal Engine 5

- Animated a cinematic [Car animation](#) using Blender.
- Designed professional animation trailer using Unreal Engine 5.
- Developed a cinematic movie clip for Star Wars in Unreal Engine 5.

CERTIFICATIONS & ACHIEVEMENTS

Unreal Engine Animation Certificate: [Udemy](#).

Unity & C#: [CipherSchools](#).

Ai: Master the Basics: [EDX](#).

Game Design by Epic Games: [Coursera](#).

Code-A-Haunt 2.0 Hackathon

SKILLS SUMMARY

Programming: C, C++, C#, HTML, CSS, JavaScript.

Game Engines: Unreal Engine, Unity, Godot.

Software/Tools: Blender, SQL, NoSQL, MongoDB.

Soft Skills: Problem-Solving, Self-Motivation, Adaptability, Team Player, Leadership.
